Mohammad Alnawawreh

Computational Engineer | Odoo Developer
+970 568833066 | mnawawra900@gmail.com | Bethlehem, Palestine
Portfolio | LinkedIn

PROFESSIONAL SUMMARY

Motivated Computational Engineer with a strong academic background in numerical methods, finite element analysis, and programming. Proficient in Python, FEA tools, and Odoo development, with experience in developing custom modules, building APIs, and automating business processes.

EDUCATION

B.Sc. in Computer Simulation Engineering Bethlehem University, Palestine | August 2021 - July 2025
GPA: 3.39/4.0 (Major: 3.43/4.0).

Exchange Student Université catholique de Louvain (UCLouvain), Belgium | February 2025 - May 2025
Scientific report on Space-Time Discontinuous Galerkin Methods for Hyperbolic Equations.

EXPERIENCE

Odoo Development Intern ProMax Serve, Qatar | Remote | August 2025 - April 2026

- Developed and customized Odoo modules (v16/v17) using Python and Odoo ORM to automate business processes.
- Built REST APIs to integrate Odoo with external systems (registration and payment), handling data exchange and authentication.
- Enhanced Odoo functionality by building wizards, setting up automated cron jobs for data sync, and customizing XML views for better usability.

Writing Scientific Report Bethlehem University, Palestine | October 2024 - December 2024

- Conducted scientific report on numerical methods for heat equations.
- Analyzed different computational approaches for accuracy and stability.
- Developed comprehensive report on methods performance.

FEA & Modeling Intern FAU Erlangen-Nürnberg, Germany | Remote | Jul 2024 - Aug 2024

- Modeled a 3D cantilever beam under load, conducted mesh sensitivity analysis, and assessed shear locking and hourglass effects.
- Performed finite element analysis using ABAQUS software.
- Analyzed structural behavior in engineering applications.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, C++ (OpenGL library).
Databases: PostgreSQL.
Web Technologies: HTML5, CSS3, Bootstrap.
Engineering Software: ABAQUS, ETABS, MATLAB.
Development Tools: Git, VS Code, CodeBlocks, Eclipse.

LANGUAGES

Arabic: Native | **English:** Fluent
