PROFESSIONAL SUMMARY

Motivated Computational Engineer with a strong academic background in numerical methods, finite element analysis, and programming. Proficient in Python, FEA tools, and Odoo development, with experience in developing custom modules, building APIs, and automating business processes.

EDUCATION

B.Sc. in Computer Simulation Engineering Bethlehem University, Palestine | August 2021 - July 2025
GPA: 3.39/4.0 (Major: 3.43/4.0).

Exchange Student Université catholique de Louvain (UCLouvain), Belgium | March 2025 - May 2025
Scientific report on Space-Time Discontinuous Galerkin Methods for Hyperbolic Equations.

EXPERIENCE

Odoo Development Intern AlShayeb Partners, Palestine | Hybrid | April 2026 - Present

- Engaging in comprehensive training on Odoo's core accounting and auditing modules, including Inventory, Accounting, CRM, Sales and Manufacturing.
- Developing a deep understanding of module functionalities and workflows to support business process optimization.
- Collaborating with a team in a hybrid work environment, focusing on practical application of Odoo solutions for financial and business management.

Odoo Development Intern ProMax Serve, Qatar | Remote | August 2025 - April 2026

- Developed and customized Odoo modules (v16/v17) using Python and Odoo ORM to automate business processes.
- Built REST APIs to integrate Odoo with external systems (registration and payment), handling data exchange and authentication.
- Customized ERP modules for client implementations, improving workflow automation and data accuracy.

FEA & Modeling Intern FAU Erlangen-Nürnberg, Germany | Remote | July 2024 - August 2024

- Modeled a 3D cantilever beam under load, conducted mesh sensitivity analysis, and assessed shear locking and hourglass effects.
- Performed finite element analysis using ABAQUS software.
- Analyzed structural behavior in engineering applications.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, C++ (OpenGL library).

Databases: PostgreSQL.

Web Technologies: HTML5, CSS3, Bootstrap.

Engineering Software: ABAQUS, ETABS, MATLAB.

Development Tools: Git, GitHub, VS Code, CodeBlocks, Eclipse, Postman.

LANGUAGES

Arabic: Native | **English:** Fluent
